

Using state-of-the-art advanced minimally invasive surgery including single incision "scarless" gallbladder removal and the new 3mm mini laparoscopic technique.

Advanced Surgical Associates is your home for surgical excellence and optimum surgical care in Montgomery and Central Alabama. Since 1983, Dr. Wesley H. Barry, Jr. and his team of specialists have provided insightful and innovative surgical solutions – across the medical spectrum – for patients of all ages.

Offering consultative, diagnostic, and therapeutic services for a wide range of surgical disorders, and using the latest cutting edge surgical techniques, such as advanced minimally invasive laparoscopic procedures, allows complex operations to be successfully performed through small incisions.

We specialize in the use of laparoscopic surgery techniques, including the use of 3mm mini laparoscopic surgery technique, for many of the surgeries we perform. Using advanced minimally invasive surgical techniques minimizes trauma and affords patients a faster recovery, decreased pain and an earlier return to normal activity.

Healthcare referral providers and their staff are provided prompt, professional transitions of their patients to our practice where we efficiently and effectively communicate our surgical prescriptions, plans, and recommendations back to the referral provider. This way, providers and patients completely understand the level, complexity and prognosis of the disorders as we treat them.

Did you know that when the best choice for your health is surgery, you can choose the surgeon you prefer?

Our highly skilled team of healthcare professionals is committed to making your surgical experience as pleasant, comfortable and as stress-free as possible. The foundation of our commitment is deeply rooted in the fact that Dr. Wesley Barry, Jr. along with collaborating specialty surgeons are board certified. We have the credentials, capability, compassion and experience to deliver the optimum care that providers depend on and that patients and families deserve.

LAPAROSCOPIC AND GENERAL SURGERY

WESLEY H. BARRY, JR. M.D., FACS, FSSC

With more than 30 years of surgical experience, Dr. Wesley H. Barry, Jr. is widely recognized as a surgical pioneer in the Alabama River Region for his work in highly specialized areas, from pediatric surgical procedures to major cancer operations such as those involving the breast, colon, stomach, and rectum. Dr. Barry has performed more than 20,000 surgeries and has a special interest in thyroid and parathyroid surgery; and a particular interest in laparoscopic and minimally invasive procedures including the 3mm mini laparoscopic technique. He is also one of only a few experienced and certified spinal approach surgeons in Central Alabama.

SURGICAL AFFILIATIONS INCLUDE: Jackson Hospital, Baptist Medical Center South, Montgomery Surgical Center and Jackson Surgical Center.

SURGICAL SPECIALTIES

Many of the listed surgical procedures are performed with very small incisions through the use of laparoscopic surgery techniques. These procedures include the use of our 3mm mini laparoscope which means less pain, little or no scarring, a shorter hospital stay, faster recovery, an earlier return to normal activity and a better overall outcome for our patients.

Please inquire regarding whether your particular surgery can be performed with minimally invasive techniques.
